Ecount ERP
Web-based ERP for small and medium-sized businesses

Ecount ERP is a web-based ERP developed for small and medium-sized businesses. Ecount, founded in 1999, now services over 10,000 clients worldwide. Ecount strives to create the best and most affordable ERP solution available. Many small businesses need an internal management system, but lack the capital or resources required to employ other ERP solutions. With Ecount ERP, business managers can oversee the daily activities, reduce the number of hours wasted on redundant work, decrease their dependency on Excel, and gain greater insight into their overall business operations.

Why choose Ecount ERP?

• Developed, integrated features – Ecount ERP provides features most small and medium-sized businesses require. These features are fully integrated and fully functional, which include accounting, inventory, production, purchasing, sales, and collaboration modules.

• Short deployment and implementation – Unlike many on-premises ERP systems requiring installation, Ecount ERP does not require months of development and implementation. The program is made available to you in just a matter of hours, not months.

• Higher user adoption rate – Ecount provides a customizable ERP program that allows users to make menu configurations according to the needs of their company, which often leads to a higher rate of adoption. Over 95% of Ecount clients have successfully implemented the system, resulting in overall user satisfaction.

• Return on investment – Most ERP systems require capital, IT resources, and time. All of these add up and it can take anywhere between 2-5 years to break-even and see a return. This is true of both on-premises ERP and other SaaS ERP providers. With Ecount, companies will be able to hit the break-even point and see a ROI in much less time.

• Clear cost of ownership – The yearly subscription to Ecount ERP is only $600. There will not be additional costs for configuration or even costly upgrades in the future.

To find out more, contact us at ecounterp@prowess.in or visit www.EcountERP.com
• **Scalable program** – Ecount ERP is designed to grow and adapt with the evolving business environment. Ecount offers free scheduled upgrades to improve current features and add new ones. You will not be left with an obsolete system that is too costly or impossible to reconfigure.

• **Customizable** – The program is completely customizable for many different types of businesses and industries. Users can easily activate or deactivate features and modules. The entry screens and templates can also be customized to include important information.

• **Real-time reports** – Reporting is essential for sound decision making. Ecount ERP offers various financial, accounting, inventory, sales, and purchasing reports with customizable templates.

• **Access anywhere, at any time** – All data is stored in the cloud allowing users program access from any computer at any time. Data is also less susceptible to being lost due to stolen devices, computer crashes, malware, and viruses.

• **Industries** – While Ecount ERP is a turn-key software, it was created with multiple industries in mind. We have thousands of clients from different industries including manufacturing, food distribution, retail, service-based, and more.

Why is the price so low?

The goal of Ecount ERP is to provide an affordable, yet fully functional, ERP system to small and medium-sized businesses. Over the past few years, Ecount’s client base has greatly expanded and now includes over 10,000 active subscribers. Due to the increase in clientele, the overall operating cost of maintaining the program servers, software development and overhead, is distributed even further among the subscription fees collected from a larger number of clients. Furthermore, since the program is standardized, no additional costs are incurred from user configuration. Therefore, Ecount is fully capable of keeping the subscription fee for customers as low as possible.
Program Features

Accounting & Finance Management
The accounting module is a cloud-based accounting and financial management software that is integrated with all the other modules. Manage receipts, payments, accounts payable/receivable, notes payable/receivable, cash flow, fixed assets, invoicing, and multiple ledgers. With Ecount ERP, businesses gain greater insight into their costs, profitability, and expenses from all their vouchers and books. Users can pull information from the production, sales, inventory, or purchasing menus to invoice transactions, record cash payments and receipts, create sales slips or vouchers, and more.

- Easy to use for novice and experienced accounting clerks
- Reduce reliance on Excel spreadsheets
- Increase efficiency with less re-keying and redundant work
- Track expenses and costs by department, project, account manager, and more.

Reporting
Many businesses find it difficult to create up-to-date inventory, sales, accounting/financial, purchasing, and production reports. As a result, the decision-making process is severely affected due to limited access to quick, accurate information. Ecount ERP helps alleviate these common issues for small and medium-sized businesses.

- Create real-time reports in less time
- Easier than creating templates and reports in Excel
- Create summarized or detailed reports
- Create individual or comparison view reports
- Can export all reports to Excel spreadsheets
- Generate historical reports to evaluate business trends

Accounting & Financial Reports

- Balance Sheet
- Income Statement
- Retained Earnings Statement
- Schedule of Costs Status
- Payments Journal Sum.
- Receipts Journal Sum.
- Cash Report
- Cash Flow
- Funds Statement
- Funds In/Out Details
- Monthly Income Statement
- Monthly Cost
- Graphs
- AR/AP Aging
- Management Report
- Accounting Summary
- Daily Profit Report

To find out more, contact us at ecounterp@prowess.in or visit www.EcountERP.com
Sales Flow Management

The sales menu in Ecount ERP allows businesses to manage the sales flow by using a centralized ordering system. Users can track the sales process from planning to shipment and invoicing.

- Customizable program can fit different sales flows
- Track sales goals and performance
- Customers can view the sales order status through the free online customer portal
- Easily send data to the accounting module for sales invoicing
- Increase efficiency and reduce errors by pulling previously entered quotes and sales orders
- Generate sales reports and summaries in little time
- Manage customer credit limits

Inventory management

With the inventory management feature, businesses can manage inventory in an unlimited number of locations, manage safety stock, price levels, inventory adjustments, returns, warranties, and more. Ecount comes with multiple features that enable companies to effectively manage inventory costs.

- Barcode software to generate and print ISBN, QR codes, Data Matrix codes, and more
- Generate serial numbers instantly and assign them to products
- Manage production or distribution quality with serial numbers, quality control, and after-sales management
- Apply different price levels, discounts or premiums, effortlessly
- Create summarized or detailed inventory reports
- Create individual or comparison view reports

Sales Reports

- Sales Status
- Quote Status
- Sales Order Status
- Sales Slips Overview
- Outstanding Quote Overview
- Outstanding Sales Order Overview
- Accounts Receivable by Customer
- Pre-invoicing Status
- Sales Invoice Overview

Inventory Reports

- Inventory Balance
- Inventory Balance by Location
- Inventory by Mgmt. Field
- Inventory Book I & II
- Inventory Fluctuation
- Management Report
- Location Transfer Status
- Internal Use Report
- Defect Status
- Defect Rate Report
- Physical Inventory
- Inventory Adjustment Status

To find out more, contact us at ecounterp@prowess.in or visit www.EcountERP.com
Purchase Flow Management

The purchasing menu allows businesses to manage the purchase flow with greater ease. Ecount helps businesses manage the various factors that affect the purchasing department. When users create a purchase plan, the program will consider minimum purchase quantities, current stock, safety stock, sales orders, and job orders. Fully manage purchase requests, purchase orders, minimum order quantities, pricing, and more.

- Link purchase plans to purchase requests and sales orders
- Use the e-Approval feature to easily track and approve purchase requests
- Integrated with the inventory module for easy inventory verification before making unnecessary purchases
- Assign serial numbers to purchases to track quality issues

Purchasing Reports

- Purchase Status
- Purchase Request Status
- Purchase Order Status
- Outstanding P/O Status
- A/P by Vendor
- Purchase Invoice List

Production Management

The production management feature includes work order management, goods receipt management, defect and quality control, cost allocation, process management, outsourcing management, and BOM management.

- Lot testing and sampling feature for quality control
- Manage defects with serial number management, quality testing, and defects reporting
- Gain insight into wasted materials by comparing actual versus standard consumption

Production Reports

- Job Order Status
- Production Status by Job Order
- Goods Issued Overview
- Goods Receipt Overview
- Goods Receipt/Consumed Status

Collaboration (Groupware)

The collaboration software aims to help teams to better coordinate projects and communicate easily with each other. The software includes an e-Approval feature, schedule management, timesheet tracking, work boards, and freely customizable boards.

- Share and store documents and images in the program
- Reduce approval bottleneck with e-Approval
- Reduce paperwork loss by attaching documents to submissions
- Maintain data security with an internal email system

To find out more, contact us at ecounterp@prowess.in or visit www.EcountERP.com
Real-time Information

The beauty of a web-based system is that it is not limited to a single computer or network. Users can access the program from anywhere in the world at any time and see the same information. Remote employees can still share work and ideas on share boards or download the same financial report.

Users with mobile devices can access the mobile version and enter sales while out in the field without having to install any software. The data remains secure even if a computer or smartphone is lost or stolen. The possibility of business interruptions due to computer or software issues greatly decrease.

Country Settings

Ecount ERP can be used in multiple countries. Companies from all over the world use Ecount on a daily basis. You can set:
- Time zones
- Currencies
- Tax rates
- Language – currently supports English, Spanish, Korean, Chinese (Mandarin), and Japanese.

Customizable

Ecount ERP is completely customizable in order to easily fit to work with different industries and businesses. Users save configuration costs by simply setting the functions of the program to include what is necessary. As the business scope expands, businesses can even modify the program to meet the new needs and challenges. Users can modify:
- Features
- Menus
- Entry screens
- Templates
- Work boards
- Approval settings
- User authorization
- Security settings
Data Security & Stability

ISO 27001 Certification

Ecount believes client data security is paramount. Therefore, Ecount created a secure information management system in order to receive the ISO 27001 certification. This certification proves that Ecount has successfully created a system that is capable of identifying and planning for potential data security threats.

System Stability and Security

The stability and security of the program is of the utmost importance. Ecount has developed measures to ensure the program is stable and protected from data infiltrations. The Ecount servers are housed at a secure data center with 24-hour security. All data is stored on multiple servers and backed up on a daily basis. The servers have an uninterruptible power supply, firewall, data encryption, secure sockets layer (SSL), and intrusion prevention system to protect from potential security breaches. Ecount utilizes the latest security measures to ensure data is kept secure at all times. Furthermore, Ecount has an uptime of 99.8%. System updates are scheduled to take place during off-hours and on a weekly basis.

Ecount ERP has many security measures built into the program to protect it from unauthorized access. You can customize the program to restrict certain IP addresses, prevent users from logging in at particular times, prevent users from viewing various pages and reports, and set periods of restriction where data cannot be modified.

Authorization Settings

To protect sensitive information, the program has settings that can block certain users from viewing the information. The settings are extremely easy to modify if some users will eventually need to access the sensitive information. Users can:

- Set the accessible time period and authorized IP addresses
- Manage individual user authorization
- Create authorization groups for menus, modules, work boards, and locations
- Set password change intervals for increased security
- Lock accounts after 5 attempted logins
- Set multiple Master IDs to manage the authorization settings

Audit Trail

Ecount ERP keeps a record of all changes made within the program. Managers can view if a particular document or voucher was deleted, who deleted it, and when. It is also possible to view when and where all users logged in to see if the program was accessed by an unrecognized computer.

To find out more, contact us at ecounterp@prowess.in or visit www.EcountERP.com
Subscription Procedures

Our subscription policy is simple; use of the entire system is only $600 per year. If you sign up for the paid subscription during the 15-day free trial, you will still get the remaining free trial days absolutely free. Contact us to sign up today.

What if I decide on a free trial first?
Try the program free for 15 days and you can choose to sign up at the conclusion of the trial period.

What if I subscribe immediately?
Get 15 days free upon subscription.
